

Tatiana (42) & Suhaib (46)

Edmonton, Alberta

About us

Suhaib and I have been together since 2010 but married just for 2 years. We are coming from all over the world. I am from Romania. I'm an only child and I don't have many relatives. On the other hand, Suhaib comes from a big family with a lot of relatives. His primary family has 2 boys and 3 girls and all of them they are back in the Middle East. I am a kindergarten teacher at the public school here in our city and my husband is a physician. Working with children made my childless life even more difficult because I chose this career for the love of children. My husband is a successful cardiologist with 3 clinics and 3 hospitals he serves and that makes very little time for fun but I am trying to make his schedule work to have some time together for hobbies like hiking, dancing and cooking. We love to entertain and for this we made our house into a party house with a wood oven in the backyard. My husband has a 13 years old son who lives with his mom back in the Middle East. I see my husband missing him a lot and he travels 3 times a year just to see him for one day.

Why surrogacy

It took us a lot of attempts to have a child on our own before deciding to pursue surrogacy. Since summer 2013 we were visiting the fertility clinic here in our city. We have tried IUI and IVF, without any luck. After the government clinic closed up we were asked to move to the private clinic and this clinic refused to pursue any fertility treatment with me because of mine and my husband's age. The second miscarriage made us pursue surrogacy because I ended up in the hospital with a massive hemorrhage and I had to stay in the hospital for observation for 2 days. The gynecologists who was caring for me, advised me to follow other paths to have children. I have 2 embryos in the freezer still that have been tested by Igenomix and that makes me hopeful I will be a Mom one day.

What we would like to say to potential surrogate

I really think there is an empathic person out there that is willing to help couples who's circumstances didn't give them children on their own. When I stepped the first time into a fertility clinic and I heard about mother/surrogates, I thought for sure there wasn't many women who would do this for someone. It must be hard to give your body and feelings to somebody you barely know and to grow their child that you know will not live with you. But please know that we are well-rounded, happy, kind and very honest, loyal and trustworthy. Our surrogate will be part of our family and will be treated with the utmost care and respect. I really hope there is an amazing person out there who would want to speak with us and get to know us more.

Warmest wishes!
